Usage instructions

Take out the USB receiver from inside the box, and insert it into a USB port in your PC. To use it for the first time, please turn on the power switch at the bottom of the mouse by toggling to the “ON” position. The mouse and USB receiver will automatically sync. When the mouse is not being used, push the power switch to the “OFF” position.

Smart sleep and wake

The mouse has an automatic wake up and sleep function. If the mouse is not used for a period of time, it will go into a sleep state. To come out of the sleep state, you can press any button on the mouse which will enable tracking, the mouse lights will turn on and the mouse will start working with the receiver.

Rechargeable battery

This mouse has a non-user-accessible rechargeable lithium battery. The product can be used when charging, however, it will extend the charging time. When the battery gets too low, the mouse will stop working until it is recharged.

Charging indications:

The left side LED will turn on to signal the charging status:

- When charging, the left side LED will shine blue.
- When it is fully charged, the LED will turn off.
- If the light is flashing, please check the connection.

A 3-4 hour charge will allow you to use the mouse for 30 to 60 days, the battery lifespan is rated for approximately 300 charges.

Technical Specifications

Measurements (LWH): 101 x 71 x 80 (mm)
Weight: 118g
Operation range: >15m
Trasmition power: +5db max
Operation voltage: 3.7v
Operation current: <5mA
Charging current: <300mA
Sleep current: < 1 u A
Sensitivity: 800dpi 12000dpi and 1600dpi settings (hold left and middle buttons together for 5 seconds to cycle between options)

Computer requirements

Windows 2000
Windows XP
Windows Vista, Windows CE, Windows 7, Windows 10
Linux
Android
Mac OSX

Maintenance

Do not remove or try to replace the device’s lithium-ion batteries. Doing so can provoke a short circuit, fire or explosion.

The battery will discharge if it is stored for a long period of time without usage.

Use the specified charger. Disconnect the device after the battery has been fully charged. Overcharging the battery will shorten its lifespan.

Use only a damp cloth with mild soap to clean the device. Solvents or other cleaning agents may damage the device.

Avoid exposing the device to very hot or cold environments. Extreme temperatures can shorten the device’s lifespan.

Common Inquiries

Below are some basic troubleshooting scenarios that can be presented while using the device. Please contact support@anthrodesk.ca if you are unable to resolve more specific issues with the device.

Problem	Possible Reasons	Solution
The mouse doesn’t respond	1. The battery is low. 2. The switch is turned off. 3. The USB receiver is disconnected.	1. Charging for at least 15 minutes. If used for the first time, needs a full charge. 2. Check to see if the switch has been turned to the “ON” position. 3. Verify if the USB receiver is connected.
Unable to connect to the receiver of the mouse	1. The receiver is not inserted correctly. 2. Because of low battery, the mouse was shut down automatically.	1. Pull out after the receiver and reinsert to the USB port. 2. Fully charge the mouse again.
The mouse pointed is irregular or slow to respond	1. Equipment may not be at an optimal receiving range. 2. Low voltage. 3. Dust and oil can be near the laser at the bottom. 4. Mouse DPI is too low.	1. Locate the product close to the receiver. 2. Charge the mouse. 3. Use a wet cloth to clean the bottom of the mouse where the laser is located. 4. Hold the left and middle buttons at the same time (800 DPI, 1200 DPI, and 1600 DPI are available).
Product not charging when connected to electricity	1. Issues with the power outlet. 2. Charging cable damaged.	1. Test your power outlet by charging a different USB device. 2. Replace the charging cable

Parts of the Vertical Mouse

Shown below are the different parts of the vertical mouse and their respective functions.

AnthroDesk
SIT. STAND. EVOLVE.

Optical Vertical Mouse

This is an ergonomic mouse that can help you lead a healthier lifestyle. Because of its innovative shape, this mouse can prevent wrist and arm injures and aches. It allows people working at the office or at home, and even people doing their pastime activities to feel better and more comfortable
